On Friday, August 15, 2008 at 3:00 p.m., the Pensacola Regional Airport will conduct a ground breaking ceremony for the Airport Terminal Expansion. The \$71 million expansion project will take approximately 24 months to complete.

In late February, the Rental Car Service facility construction began and will be completed by spring 2009. The terminal expansion will include a baggage in-line screening system, extending the ticketing check-in lobby 90 feet, expanding the passenger security checkpoint on the second level, and enlarging the gift shop and restaurant facilities on the concourse. The Airport will also expand the air carrier apron for more aircraft parking and construct a passenger shuttle lot parking area.

DMJM Aviation, the Airport's project manager; Gresham, Smith and Partners, the Airport's architecture firm; and Greenhut Construction, the Airport's construction manager at-risk firm will oversee all aspects of the terminal expansion projects.
